Ready to upgrade your AppSec program?

From easy onboarding to fast, accurate, actionable results, Black Duck outperforms Veracode across the board.

Black Duck and Veracode comparison

	BLACKDUCK®	**Veracode**
Accuracy That Scales How reliable are the scan results?	✓ Gold-standard precision with minimal noise—trusted by industries where failure isn't an option.	✗ High false positive rates slow teams down and require manual triage.
DevOps-Ready Scanning Can it keep up with modern workflows?	✓ Real-time scanning from IDE to production. Shift security left, right—and everywhere.	✗ Requires binary uploads, making early-stage scanning slow or impractical.
Deployment Flexibility Where can it run?	✓ SaaS, on-prem, or hybrid—your choice, your control.	✗ SaaS-only. Limited options for regulated or cloud-averse environments.
SCA and SBOM Leadership How strong is the open source and supply chain coverage?	✓ 20+ years of SCA leadership. Deep SBOM, license management, and compliance capabilities.	✗ Add-on SCA with limited SBOM and license management.
Language Coverage How broad is the language support?	✓ AI-augmented analysis across virtually every language.	✗ Strong in Java, but lags in modern and legacy languages like C/C++.
