

Ready to upgrade your AppSec program?

From easy onboarding to fast, accurate, actionable results, Black Duck outperforms Checkmarx across the board.

Black Duck and Checkmarx comparison

	 BLACKDUCK	Checkmarx
No-compromise AST How effective are the scan engines for SAST, SCA, and DAST?	✓ Fast and comprehensive SAST, SCA, and DAST scans in a single platform.	✗ Comprehensive SAST scans, but SCA shortcomings leave applications at risk.
Accuracy that scales How reliable are the scan results?	✓ Highly accurate SAST and SCA scans that can be honed to the risk profile of each application.	✗ Noisy SAST scans that waste developer time and creates frustration.
Open source visibility How important is it to detect all open source or third-party vulnerabilities and license violations?	✓ Full visibility into open source and third-party components, binaries, code snippets, and undeclared dependencies.	✗ Visibility gaps into open source and third-party dependencies and license obligations.
Complete and accurate SBOMs How strong is the open source and supply chain coverage?	✓ Full SBOM capabilities with import and export in multiple formats, full dependency information, continuous monitoring, and policy-driven enforcement.	✗ Visibility gaps prevent SBOMs from providing a complete and accurate picture of your software.
Full AppSec risk posture How important is it to get a clear view of your security posture?	✓ Integrates findings from Black Duck solutions and 150+ third-party tools.	✗ Only provides insights into their own SAST and SCA tools.
